

5% tax credit for your business - CRP Tax Credit Info.

A new tax credit is available to companies that work with Community Rehabilitation Facilities (CRP's) like Opportunities, Inc. Links to the forms and instructions from the Wisconsin Department of Revenue are listed below. Please note that the tax credit is based on only the labor dollars paid to individuals with disabilities who are working on the project. For example, if there is an 8 person assembly line and 6 of those people have disabilities, your organization can take the credit against the labor of those 6 individuals for the year.

Keep in mind the tax credit would not include overhead, materials purchased or non-disabled labor. The last important thing to note is that the credit does require a contract between Opportunities and the customer claiming the credit.
